

Gabby's Documentation Panel

Gabby finds a tree toy, and holding it with excitement.

1

Gabby recognizes her peer shaking the toy and showing it to her.

2

This panel shows how Gabby found a tree toy and excitedly played with it. She stood it up like a real tree, likely recalling a tree she had seen before and imitating it. This illustrates an early stage of '**Approaches to Play and Learning**,' where children show curiosity, interest in their surroundings, and efforts to mimic reality.

Gabby is trying to stand the tree up. She failed once but is trying again carefully.

3

Gabby made the tree stand up successfully! She observes it for a while.
